

Report of Research and Information Resources Centre

To inculcate the research skills and provide appropriate environment for research and innovation to the faculty members and postgraduate students, Guru Nanak College Budhlada has established well equipped Research and Information resource Centre in the campus. The aim of this Research and Information resource Centre is to make available paralleled, life-changing educational research opportunities, potential environment for the entire academic community to undertake research in their emerging areas.

Research and Information Resource centre has:

- Research committee to motivate students and faculty members for opportunity in higher education & research.
- Faculty members with vast research experience to supervise Post Graduate / M.Phil / Ph.D. students for minor research project.
- More than 75 printed scholarly journals and magazines, In addition to this, the centre has an in-built electronic library to provide the faculty with e-resources, i.e., e-books and e-journals. N-List and DELNET. The library also renders different kinds of services to cater the multidimensional information requirements of the faculty and the students.
- Computers with required software and high Wi-Fi speed Internet connections to access the frequent research data.
- Frequent workshops/conferences are organized to disseminate knowledge in the emerging areas of research.
- Provide scholarly communication and open access to wide collection of e-resources through N-LIST programme.
- Provide opportunities for organize and attend online seminars, workshops and training programmes in research methodology and statistical techniques.
- Provide platform to postgraduate students for learning and understanding research methodology and develops skills to write quality research papers.
- Practical training for accessing e- resources and services from various databases and websites.
