PUBLICATION OF THE PATENT OFFICE

INTRODUCTION

In view of the recent amendment made in the Patents Act, 1970 by the Patents (Amendment) Act, 2005 effective from 01st January 2005, the Official Journal of The Patent Office is required to be published under the Statute. This Journal is being published on weekly basis on every Friday covering the various proceedings on Patents as required according to the provision of Section 145 of the Patents Act 1970. All the enquiries on this Official Journal and other information as required by the public should be addressed to the Controller General of Patents, Designs & Trade Marks. Suggestions and comments are requested from all quarters so that the content can be enriched.

(57) Abstract :

The present invention relates to an IoT security system 100 and a security method using a blockchain for preventing the infringement of confidentiality, accessibility, and integrity of data that can occur in the Internet of Things. One or more node 102 for generating an operation verification request signal for requesting and executing an operation for requesting permission verification when an operation execution permission signal indicating that the operation is allowed is received; And a private network using a VPN to transmit and receive data with the node, receive an operation verification request signal from the node, and verify whether the node is allowed to execute the operation through a registered blockchain. Sends the operation verification request signal received from one or more other IoT security server 104, and if more than one IoT security server 104 permits execution, one or two to generate an operation execution permission signal and transmit it to the node. The above-described IoT security server 104.
